Femur, fractured neck of, cause of fall, 230
fractures of, closed: why not simple traction?, 244
displaced subcapital, primary total hip replacement for, 249
neck of, Monk hard-top endoprosthesis for intracapsular fractures of, 233
shaft fracture of, ipsilateral, traumatic dislocation of hip with: method of treatment, 391
fractures of, treatment of, experience with use of Vitrathene in, 42
fractures of, Ender's nails in, 287
treatment of fractures of, with early cast bracing, 239
trochanteric fractures of, difficulties and complications of Ender method of treatment of, 116
penetration in, treated with rigid nail plates, 363
with Kenwright nail, preliminary study of treatment of, 419
Fisher A.: *see* Katz S.
Fixation, external, easy method for reduction of fractures treated by, 254
internal, of trochanteric fractures, septic dislocation of hip after, 185
rigid internal, and immediate mobilization, malleolar fractures treated with, 191
Flap, bipedicled chest wall, to cover open elbow joint in burned infant, 292
muscle and myocutaneous, on lower limb, 324
reconstruction, neurovascular island, following high pressure injection injuries of hand, 181
Fleetcroft J.: Plastering: a combination of old and new, 131

Forearm bones, midshaft fractures of, in children, 153
plasters, study of pressures beneath, 37
Fracture(s), avulsion, of medial malleolus, tension band wiring of: A modified technique minimizing soft tissue injury, 519
carpal scaphoid, in children, two cases of non-union of, 441
Chance's, in double level fracture of spine, 34
closed femoral: why not simple traction?, 244
comminuted displaced, of patella, 196
of coracoid process of scapula, 203
detection of sacroiliac injury by bone scanning in, of pelvis and its clinical significance, 473
displaced subcapital femoral, primary total hip replacement for, 249
double or multiple level, of spine, 147
femoral shaft, treatment of, experience with use of Vitrathene brace in, 42
Ender's nails in, 287
with early cast bracing, treatment of, 239
of head of radius with ulnar displacement of separated fragments, 395
human tibial, $^{99}Tc^{m}$-Sn-polyphosphate scintimetric time course of, with delayed union or pseudarthrosis, 279
intracapsular, of femur, long handled punch for insertion of Newman's pins in slipped upper femoral epiphysis and, 81
of femoral neck, Monk hard-top endoprosthesis for, 233
ipsilateral femoral shaft, traumatic dislocation of hip with: method of treatment, 391
malleolar, treated with rigid internal fixation and immediate mobilization, 191
midshaft, of forearm bones in children, 153
145, prospective study of: Sarmiento tibial plaster, 10
open, prophylaxis and treatment of purulent complications in, 256
pelvic, haemorrhage from: dangers and treatment, 375
reduction of, easy method for, treated by external fixation, 254
surgical skeletal injury and, respiratory changes after, 489
tibial, controlled pressure casting of: preliminary report, 27
intercondylar, in children: review of classification and treatment of malunion, 165
normally healing, in man, time course of $^{99}Tc^{m}$-Sn-polyphosphate scintimetry of, 69
osteitis complicating, treatment of, 210
shaft, Orthoplast brace for treatment of, 133
treatment, midshaft femoral, knee after: comparison of three methods, 125
trochanteric, of femur, difficulties and complications of Ender method of treatment of, 116
of femur, penetration in, treated with rigid nail plates, 363
septic dislocation of hip after internal fixation of, 185
unstable intertrochanteric, of hip, treatment of: prospective trial of 150 cases, 139
